

Document Shepherd Write-Up for Working Group Documents

This version is dated ~~4 July 2022.~~ x X 2026.*

Thank you for your service as a document shepherd. ~~Among One of~~ the responsibilities ~~of the shepherd~~ is ~~answering to answer~~ the questions in this write-up to ~~give provide~~ helpful context to Last Call and Internet Engineering Steering Group ([IESG][1]) ~~reviewers, and your reviewers.~~ Your diligence in completing it is appreciated. The full role of the shepherd is further described in [RFC 4858][2]. You will need ~~at least~~ the cooperation of the authors and editors to complete these checks.

Note that some numbered items contain multiple related questions; please be sure to answer all of them.

Document History

1. Does the working group (WG) consensus represent the strong concurrence of a few individuals, with others being silent, or ~~did it reach~~ was a broad ~~agreement?~~ ~~agreement reached?~~
2. Was there controversy about particular points, or were there decisions where the consensus was particularly rough?
3. Has anyone threatened an appeal or otherwise indicated extreme discontent? If so, please summarize the areas of conflict in separate email messages to the responsible Area Director. ~~(It~~ (NOTE: This should be in a separate email because this ~~filled~~ questionnaire ~~is will be~~ publicly available.)
4. For protocol documents, are there existing implementations of the contents of the document? ~~Have a significant number of potential implementers indicated plans to implement? Are any existing~~ If so, are those implementations reported somewhere, either in the document itself (as [RFC 7942][3] recommends) or elsewhere ~~(where)?~~ (please state where)?

Have potential implementers indicated their plans to implement?

Additional Reviews

5. ~~Do~~ Have reviews for the ~~contents of this~~ document ~~closely interact with technologies happened~~ in other IETF ~~working groups WGs~~ or external organizations, and would it therefore benefit from their review? ~~Have those reviews occurred? organizations? If yes, describe which reviews took place. so, please provide references to those reviews.~~
6. Describe how the document meets any required formal expert review criteria, such as the ~~MIB Doctor~~, YANG Doctor, media type, and URI ~~type~~ reviews.
7. If the document contains a YANG module, ~~has the final version of the module been checked with any of does~~ the ~~[recommended validation tools][4] for syntax and formatting validation? If there are any resulting document's~~ Datatracker page indicate that it has no errors ~~or warnings, what and warnings?~~

Has a YANGDOCTOR review been done on a recent version, indicating that it is ~~the justification ready~~ for ~~not fixing them at this time?~~ publication?

Does the ~~YANG module comply with document use~~ the ~~Network Management Datastore Architecture (NMDA) as specified various templates~~ in ~~[RFC 8342][5]? RFC 9907~~

(mainly, YANG module, Security, and IANA templates)?

8. Describe reviews and automated checks performed to validate sections of the ~~final version of the~~ document written in a formal language, such as ~~XML~~ XML, JSON code, ~~BNF~~ ABNF/RBNF/BNF rules, ~~MIB definitions~~, ASN.1, CBOR's CDDL, etc.

Document Shepherd Checks

9. ~~Based on~~ Will publication of the ~~shepherd's review document be consistent with the chartered objectives and deliverables of the document, is it their WG?~~ In the shepherd's opinion ~~that~~ which charter text covers the content of the document?

10. Based on your review, is this document ~~is needed~~, clearly written, complete, **technically accurate**, correctly designed, and ready to be handed off to the responsible Area Director?

~~10.~~

11. Several IETF Areas have assembled [lists of common issues that their reviewers encounter][6]. ~~For which areas have~~ Have such issues been identified and addressed? For which **area** does this still need to happen in subsequent reviews?

~~11.~~

12. What type of RFC publication is being requested ~~on the IETF stream~~ ([Best Current Practice][12], [Proposed Standard, Internet Standard][13], [Informational, Experimental or Historic][14])?

Why is this the ~~proper~~ **appropriate** type of RFC? ~~Do all Datatracker state attributes correctly reflect this intent?~~

~~12.~~

13. If the document uses BCP 14 key words [18], does the document follow the guidance in [19]?

Have you noted any unclear or inappropriate use of key words?

14. Have reasonable efforts (e.g., WGLC via the Datatracker) been made to remind ~~all authors the WG~~ of the intellectual property rights (IPR) disclosure obligations described in [BCP 79][7]? ~~To the best of your knowledge, have all required disclosures been filed? If not, explain why. If yes,~~

Please summarize any relevant discussion, including links to ~~publicly-available~~ **publicly available** messages when applicable.

~~13.~~

15. Has each author, editor, and contributor shown their willingness to be listed as such?

If the total number of authors and editors on the front page is greater than five, please provide a justification.

~~14.~~

Document References

16. Please list any remaining I-D nits in ~~this document. the version of the document you reviewed.~~ Simply running the [idnits tool][8] is not enough; please review the ["Content Guidelines" on authors.ietf.org][15]. ~~(Also note that the current idnits tool generates some incorrect warnings; a rewrite is underway.)~~

~~15.~~ Idnits may display false positives;
please flag those and please explain as needed.

17. Should any informative references be normative or vice-versa?
See the [IESG Statement on Normative and Informative
References][16].

~~16.~~

18. List any normative references that are not freely available to
anyone. Did the community have sufficient access to review any
such normative references?

~~17.~~

19. Are there any normative downward references (see [RFC 3967][9]
and [BCP 97][10]) that are not already listed in the [DOWNREF
registry][17]? If so, please list them.

~~18.~~

20. Are there normative references to documents that are not ready
to be submitted to the IESG for publication or are otherwise in
an unclear state? If so, what is the plan for their completion?

~~19.~~

21. Will publication of this document change the status of any
existing RFCs? RFC(s)? If so, does the Datatracker metadata correctly
~~reflect this and are~~
list those RFCs listed on the title page, in the abstract, and discussed in the
introduction? If not, explain
~~why and point to the part of the document where the relationship
of this document to these other RFCs is discussed.~~

~~20.~~

IANA Considerations

22. Describe ~~the document shepherd's~~ your review of the IANA considerations section,
especially ~~with regard to~~ its consistency with the body of the document.

Confirm that all
~~aspects of the document requiring~~ IANA assignments requested actions are associated with
the appropriate reservations in IANA registries.

Confirm that any referenced IANA registries have been clearly
identified.

Confirm that each newly created IANA registry specifies its
initial contents, allocations allocation procedures, and a reasonable
name (see [RFC 8126][11]).

~~21.~~

23. List any new IANA registries that require Designated Expert
Review for future allocations. Are allocations (Expert Review, Specification
Required). If any, please confirm that the document includes
guidelines for Designated Experts. Are these instructions to
the Designated Expert clear? Please include suggestions of
~~designated experts, if appropriate.~~
