

Document Shepherd Write-Up for Working Group Documents

This version is dated x X 2026.

Thank you for your service as a document shepherd. One of the responsibilities of the shepherd is to answer the questions in this write-up to provide helpful context to Last Call and Internet Engineering Steering Group ([IESG][1]) reviewers. Your diligence in completing it is appreciated. The full role of the shepherd is further described in [RFC 4858][2]. You will need at least the cooperation of the authors and editors to complete these checks.

Note that some numbered items contain multiple related questions; please be sure to answer all of them.

Some of the questions may not be applicable for a given document. Feel free to indicate N/A or simply remove such questions from your final write-up.

Document History & Implementations

1. ~~Does~~ Have the ~~working group Chairs confirmed~~ Working Group (WG) ~~rough~~ consensus ~~represent the strong concurrence of a few individuals, for~~ this document? Did they indicate any issues to be called out with ~~others being silent, or~~ ~~was a broad agreement reached?~~ regard to that rough consensus? If so, what were they?
2. Was there ~~controversy~~ significant disagreement about ~~particular points, whether or were there decisions where not this~~ document falls within the ~~consensus was particularly rough?~~ current charter?
3. Has anyone threatened an appeal or otherwise indicated extreme discontent? If so, please summarize the areas of conflict in separate email messages to the responsible Area Director. (NOTE: This should be in a separate email because this filled questionnaire will be publicly available.)
4. For protocol documents, ~~are~~ indicate whether there is an implementation policy put in place by the WG. If so, please remind that policy and indicate whether this document adheres to that policy.

~~Are~~ there existing implementations of the contents of the document? If so, are those implementations reported somewhere, either in the document itself (as [RFC 7942][3] recommends) or elsewhere (please state where)?

Have potential implementers indicated their plans to implement?

Additional Reviews

5. Have reviews for the document happened in other IETF WGs or external organizations? If so, please provide references to those ~~reviews.~~ reviews (if any).
6. Describe how the document meets any required formal expert review criteria, such as ~~the YANG Doctor,~~ media type, and URI reviews.
7. If the document contains a YANG module, does the document's Datatracker page indicate that it has no errors and warnings?

Has a YANGDOCTOR review been done on a recent version, indicating that it is ready for publication?

Does the document use the various templates in ~~RFC-9907~~ [RFC 9907][20] (mainly, YANG module, Security, and IANA templates)?
8. Describe reviews and automated checks performed to validate sections of the document written in a formal language, such as XML, JSON code, ABNF/RBNF/BNF rules, ASN.1, CBOR's CDDL, etc.

~~## Document Shepherd Checks~~

9. ~~Will publication of~~ Does the document ~~be consistent with the~~

~~chartered objectives~~ describe any elements that are intended for human interpretation and deliverables of the WG? In the shepherd's opinion which charter text covers the content of understanding? If so, does the document?

document contain an Internationalization Considerations section that describes how those protocol elements are suitable for international use?

Document Shepherd Checks

10. Based on your review, is this document clearly written, complete, technically accurate, correctly designed, and ready to be handed off to the responsible Area Director?
11. Several IETF Areas have assembled [lists of common issues that their reviewers encounter][6]. Have such issues been identified and addressed? For which ~~area does this still need to happen in~~ areas are subsequent ~~reviews?~~ reviews believed particularly important to happen?
12. What type of RFC publication is being requested ([Best Current Practice][12], [Proposed Standard, Internet Standard][13], [Informational, Experimental or Historic][14])?

Why is this the appropriate type of RFC?

13. Will publication of this document change the status of any existing RFC(s)? If so, does the Datatracker status page for this document correctly list those RFCs on the Title page, in the Abstract, and in the Introduction of the document?
14. If the document uses BCP 14 key words [18], does the document follow the guidance in [19]?

~~Have you noted~~

Is there any ~~unclear or inappropriate~~ use of the BCP 14 key words?

- ~~14.~~ words that could be considered unclear or inappropriate?

15. Have reasonable efforts (~~e.g., WGLC via the Datatracker~~) been made to remind the WG (including the document authors, editors, and contributors) about of the intellectual property rights (IPR) disclosure obligations described in [BCP 79][7]?

Please summarize any relevant discussion, including links to publicly available messages when ~~applicable.~~

- ~~15.~~ applicable (if any).

16. Has each author, editor, and contributor shown their willingness to be listed as such?

If the total number of authors and editors on the front page is greater than five, please provide a justification.

Document References

- ~~16.~~

17. Please list any remaining I-D nits in the version of the document you ~~reviewed.~~ reviewed that you feel are actual errors. Simply running the [idnits tool][8] is not enough; please review the ["Content Guidelines" on authors.ietf.org][15]. Idnits may display false positives; please flag those and please briefly explain as needed.

- ~~17.~~

(NOTE: No need to provide explanation for common false positives that are self-explanatory such as the existence of a newer version of referenced I-D)

Document References

18. Should any informative references be normative or vice-versa?
See the [IESG Statement on Normative and Informative
References][16].

~~18.~~

19. List any normative references that are not freely available to anyone. Did the community have sufficient access to review any such normative references?

~~19.~~

20. Are there any normative downward references (see [RFC 3967][9] and [BCP 97][10]) that are not already listed in the [DOWNREF registry][17]? If so, please list them.

~~20.~~

21. Are there normative references to documents that are not ready to be submitted to the IESG for publication or are otherwise in an unclear state? If so, what is the plan for their completion?

~~21. Will publication of this document change the status of any existing RFC(s)? If so, does the Datatracker metadata correctly list those RFCs on the title page, in the abstract, and in the introduction?~~

IANA Considerations

22. Describe your review of the IANA considerations section, especially its consistency with the body of the document.

Confirm that all IANA requested actions are associated with the appropriate reservations in IANA registries.

Confirm that any referenced IANA registries have been clearly identified.

Confirm that each newly created IANA registry specifies its initial contents, allocation procedures, and a reasonable name (see [RFC 8126][11]).

23. List any new IANA registries that require Designated Expert Review for future allocations (Expert Review, Specification Required). If any, please confirm that the document includes guidelines for Designated Experts. Are these instructions to the Designated Expert clear?
